INFORMATION FOR ORDERING ACTIVITIES
APPLICABLE TO ALL SPECIAL ITEM NUMBERS

1a. Special Item Numbers: 132-50 – Training

1b. Lowest priced model and lowest unit prices:

- NETAPP-ADMIN91 - ONTAP Administration: What is New in ONTAP 9.1 - $680.10
- NETAPP-CIFSAD-REV06 - ONTAP SMB Administration - $680.10
- Data ONTAP NFS Administration - $680.10

1c. Training Course Descriptions: See page 4.

2. Maximum Order: $500,000.

3. Minimum Order: $100.

4. Geographic Coverage: The geographic scope of the contract will be the 48 contiguous states including the District of Columbia, Alaska, and Hawaii.

5. Points of Production: United States

6. Discount from List Prices: Prices shown in pricelist are net. Discounts have been deducted and the Industrial Funding Fee has been added.

7. Quantity Discounts: None. However, discounts for orders placed that exceed the maximum order threshold shall be negotiated on an order by order basis.

8. Prompt Payment Terms: 0%; Net 30

9a. Acceptance of Government purchase cards below micro-purchase threshold: Unitek Education accepts Government Purchase Cards below the micro-purchase threshold.

9b. Acceptance of Government purchase cards above micro-purchase threshold: Unitek Education accept Government Purchase Cards above the micro-purchase threshold.

10. Foreign Items: None

11a. Time of Delivery: 30 Days ARO or as negotiated with ordering activity.

11b. Expedited Delivery: To be negotiated per each delivery order.

11c. Overnight and Two-day Delivery: To be negotiated per each delivery order.

11d. Urgent Requirements: Contact Unitek Education for urgent requirements.

12. F.O.B Points: Destination

13a. Ordering Address: Unitek Education, LLC
Atten: Varsha Sony/Bahram Eslampour
4580 Automall Parkway, Suite 200
Fremont, CA 94538

13b. Ordering Procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs), and a sample BPA can be found at the GSA/FSS Schedule homepage (fss.gsa.gov/schedules).

14. **Payment Address:**

Unitek Education, LLC

28.   **Training Course Descriptions:**

Course Name:	CTX-CXA-206: Citrix XenApp 6.5 Administration
Description:	Citrix XenApp 6.5 Basic Administration training course provides the foundation necessary for administrators to effectively centralize and manage applications in the datacenter and instantly deliver them as a service to users anywhere. Learners will receive training for installing and configuring Citrix XenApp 6.5 for Windows Server 2008 R2, Citrix Receiver and plug-ins, as well as for using administrative consoles and tools to configure resources, policies, server and farm settings, printers, virtualized applications and more.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CXD-105: Citrix XenApp and XenDesktop Help Desk Support
Description:	The Citrix XenApp and XenDesktop Help Desk Support course provides help desk

	representatives with the skills required to effectively troubleshoot and resolve user issues faster, prevent issues from reoccurring and use the proper consoles during troubleshooting to quickly determine the root cause of user issues within a XenApp or XenDesktop 7.x environment. Students will leave class with the ability to troubleshoot user issues, including interpreting user needs, asking the proper questions to resolve common issues, and applying documentation practices when troubleshooting to ensure a smooth transition when escalation is necessary.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CXD-301: Citrix XenApp and XenDesktop Advanced Concepts - Optimizing the End User Experience
Description:	In this course students will learn how to optimize an environment to deliver a great user experience. Starting with the user device and Citrix Receiver, the course covers advanced deployment and configuration options to optimize the delivery of their apps and desktops. Students continue with enhancing the StoreFront experience through custom branding and advanced customization options. Finally, course attendees will learn how to optimize the VDA for a better experience including faster logons, HDX graphics tuning, multimedia, and additional configurations for double hop HDX connections. Although many options exists for deploying and configuring a XenApp and XenDesktop solution, this course focuses

	on the aspects of the solution that impact the user workflow and user experience. The recommended configurations taught in this course are based on real world experience of Citrix Consulting architects and consultants working with customers worldwide to streamline the user experience and optimize for complex scenarios.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CXD-302: Citrix XenApp and XenDesktop Advanced Concepts - Troubleshooting
Description:	In this course students learn how to troubleshoot complex end user and infrastructure issues through the use of support tools, Insight Services, and the PowerShell SDK. The course follows a troubleshooting methodology using real world support issues as example scenarios to demonstrate how to identify and remediate issues with the proper tools. At the end of the course students will have the skills they need to diagnose and remediate failures with a faster time to resolution and to identify the root cause to prevent future occurrences.

This course was created in conjunction with Citrix Support and Citrix Consulting to identify the top support issues and incorporate them into the hands on lab exercises. All lab exercises in this course are based on real issues. This course has intensive lab exercises using the same tools that Citrix Support uses on support cases. |

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CXD-400: Designing App and Desktop Solutions with Citrix XenApp and XenDesktop
Description:	Unitek Education's CXD-400 Designing Citrix XenDesktop 7 Solutions provides students with the ability to successfully assess and design a XenDesktop 7 app and desktop solution based on the top key projects and architectures that a majority of Citrix customers implement, across different industries and use cases. Students may also have an opportunity to build a design for their organization and will have access to all of the tools and reference materials required to support their work.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CMB-300: Deploy and Manage XenApp/XenDesktop 7.6 Fast Track
Description:	This course provides students an accelerated path to obtain the skills required to successfully deploy and support a complete Citrix hosted application and desktop virtualization solution in a Windows Server 2012 R2 environment. Throughout this course, students will learn how to configure an environment that includes the following Citrix components: XenApp and XenDesktop, XenServer, Citrix License Server, MCS, Provisioning Services (PVS), Personal vDisk, StoreFront, NetScaler (including

	NetScaler Gateway), and Citrix Receiver. Upon course completion, students will be able to build a XenApp and XenDesktop 7.6 environment from scratch, test the implementation to ensure that all components work as expected, and successfully manage, monitor, and troubleshoot a XenApp and XenDesktop 7.6 solution.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CXD-203: Managing App and Desktop Solutions with Citrix XenDesktop 7.6
Description:	Unitek Education's Managing Citrix XenDesktop 7 Solutions course provides students with the skills required to effectively support a Citrix app and desktop virtualization solution in a Windows Server 2012 environment. This course is based on final product code and is currently available through select Citrix Authorized Learning Centers (CALCs). Please note: The Early Release course is available through August 16, 2013, via select CALCs, to enable organizations before Citrix XenDesktop 7 is in market. Beginning August 19, 2013, all Early Release courses will be converted to the subsequent version of this course, based on the final product code. Upon completion of this course, students will learn how to successfully manage, monitor, support and troubleshoot a XenDesktop 7 solution, which includes growing the implementation to accommodate changes in the environment (adding new apps, new users, new desktops,) and troubleshooting common issues.

Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CXD-300: Deploying App and Desktop Solutions with Citrix XenApp and XenDesktop 7.6
Description:	Unitek Education's Deploying Citrix XenDesktop 7 Solutions course provides students with the skills required to successfully deploy a complete Citrix hosted application and desktop virtualization solution in a Windows Server 2012 environment. This course is based on final product code and currently available through select Citrix Authorized Learning Centers (CALCs). Throughout this course, students will learn how to configure an environment that includes the following Citrix components: XenServer, XenDesktop, Citrix License Server, MCS, PVS, Personal vDisk, Storefront, NetScaler (ICA Proxy, Load Balancing, Endpoint Analysis), and Citrix Receiver. Upon course completion, students will be able to build an environment including all XenDesktop 7 components from scratch. Please note: The Early Release course is available through July 26, 2013, via select CALCs, to enable organizations before Citrix XenDesktop 7 is in market. Beginning July 29, 2013, all Early Release courses will be converted to the subsequent version of this course, CXD- 300-2I Deploying Citrix XenDesktop 7 Solutions, based on the final product code.

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CMB-207I: Citrix XenApp and XenDesktop Fast Track
Description:	Unitek Education's fast-paced Citrix Desktop Virtualization course covers select content from training courses CXA- 206I and CXD-202I and provides the foundation necessary for students to effectively centralize and manage desktops and applications in the

	datacenter and deliver them as a service to users anywhere. Students will learn how to build XenApp and XenDesktop environments; assign virtual desktops; deliver published resources and printers to users; use policies to customize farm settings and the user experience; and administer the environments. In addition, students will learn how to build a Provisioning services farm to enable single-image desktop management. This accelerated offering includes a skills update to the features and functionality of XenApp 6.5, plus the following key XenDesktop learning's: • Install and configure XenDesktop • Manage desktop catalogs and groups • Stream desktop to virtual and physical machines • Administer Provisioning Services components • Deliver local VM desktops

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CNS-220: Citrix NetScaler Essentials and Traffic Management
Description:	The objective of the Citrix NetScaler 11 Essentials and Networking course is to provide the foundational concepts and skills necessary to implement, configure, secure, monitor, optimize, and troubleshoot a Citrix NetScaler system within a networking framework. This course is designed specifically for students who have limited or no previous NetScaler experience. Students will have

	access to hands-on exercises within a virtual lab environment. This course is based on the Citrix NetScaler 11 product, but the skills and fundamental concepts learned are common to earlier product versions. An optional module on NetScaler SDX appliances is included with reinforcement simulation exercises.

Course Name:	CTX-CNS-301I: Citrix NetScaler 11 Advanced Implementation
Description:	Unitek Education's Citrix NetScaler 10 Advanced Implementation provides the foundation to manage, configure and monitor advanced features and components of Citrix NetScaler 10. Interactive discussion and hands-on labs guide learners through advanced administration tasks such as

	troubleshooting, configuring application security with Citrix Application Firewall, tuning the NetScaler for high-traffic loads, configuring AAA for system management, and configuring advanced policies using service callouts. Advanced monitoring and management tasks such as configuring and implementing NetScaler Insight Center, Command Center, and NetScaler Web Logging are also covered. Prior NetScaler knowledge is strongly recommended. In order to successfully complete this course, learners will have access to hands-on exercises within a virtual lab environment. This course is based on the Citrix NetScaler 10.1 product, but the skills and fundamental concepts learned are common to earlier product versions.
Location (On or Off-site):	Worldwide/Online

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CTX-CVE-401I: Engineering a Citrix Virtualization Solution
Description:	The CVE-401I Engineering a Citrix Virtualization Solution course teaches Citrix engineers how to plan for and perform the tasks necessary to successfully integrate the component technologies that make up a Citrix virtualization solution in a Windows Server 2008 environment. Upon course completion, students will be able to interpret environmental data and integrate key Citrix virtualization technologies, including XenApp, XenServer, and XenDesktop, to create a holistic, end-to-end virtualization solution that will address the most pressing business issues of the day. The

	extensive, highly hands-on curriculum includes exercises that allow students to demonstrate the advanced technical knowledge gained from instruction.
	This course prepares learners for exam A15, the requirement for the CCEE for Virtualization.

Course Name:	SEC-CEH: Certified Ethical Hacker (CEH) Boot Camp v9
Description:	This class will immerse the students into an interactive environment where they will be shown how to scan, test, hack and secure their own systems. The lab intensive environment gives each student in-depth knowledge and practical experience with the current essential security systems. Students will begin by understanding how perimeter defenses work and then be lead into scanning and attacking their own networks, no real network is harmed. Students then learn how intruders escalate privileges and what steps can be taken to secure a system. Students will also learn about Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation. When a student leaves this intensive 5 day class they will have hands on understanding and experience in Ethical Hacking. This course prepares you for EC-Council ANSI accredited Certified Ethical Hacker exam 312-50.

Course Name:	SEC-CHFI: Computer Hacking Forensic Investigator (CHFI) Boot Camp v8
Description:	Unitek Education teaches the most advanced Computer Forensic Investigation course in the world. CHFIv8 presents a detailed methodological approach to computer forensics and evidence analysis. It is a comprehensive course covering major forensic investigation scenarios that enable students to acquire hands-on experience

	on various forensic investigation techniques and standard tools necessary to successfully carry-out a computer forensic investigation. Battles between corporations, governments, and countries are no longer fought using physical force. Cyber war has begun and the consequences can be seen in everyday life. With the onset of sophisticated cyber-attacks, the need for advanced cyber security and investigation training is a mandate in the present day. If you or your organization requires the knowledge or skills to identify, track, and prosecute the cybercriminals, then this is the course for you. This course helps students to excel in digital evidence acquisition, handling and analysis in a forensically sound manner. Acceptable in a court of law, these skills will lead to successful prosecutions in various types of security incidents such as data breaches, corporate espionage, insider threats and other intricate cases involving computer systems.

Course Name:	COMP-A+NET+SEC+: A+ Network+ and Security+ Certification Boot Camp
Description:	The A+, Net+ and Security+ certifications are generally the benchmark of most entry-level positions in Information Technology. Unitek Education understands the importance of certification, but also prides itself on their emphasis on helping students to obtain valuable knowledge that they can apply beyond the classroom and within the workplace. This ten-day accelerated course provides IT professionals with the understanding of hardware, networking and security skills, while providing the technical and performance-based expertise to pass the certification exams! The value of certification has risen, as the job market has become more competitive and employers are demanding experience with certifications. Unitek Education's program offers award- winning training, which has helped individuals to advance their career

	development. Those possessing the certification are more likely to receive higher salaries in comparison to those without certification.

Course Name:	COMP-SECURITY+: CompTIA Security+ Certification Boot Camp
Description:	Unitek Education offers the best accelerated CompTIA Security+ Certification training designed to help you pass the new SY0-401 exam. Get Security+ certified in less time, for less money, and gain real hands-on information security experience.

Our CompTIA Security+ Certification boot camp is designed to provide information technology professionals with the key skills to master the performance aspect of the certification while providing base knowledge on industry wide topics including communication security, infrastructure security, cryptography, access control, authentication, external attack and operational and organization security.

The CompTIA Security+ certification will certify that the successful candidate has the knowledge and skills required to identify risk, to participate in risk mitigation activities, and to provide infrastructure, application, information, and operational security. In addition, the successful candidate will apply security controls to maintain confidentiality, integrity, and availability, identify appropriate technologies and products, troubleshoot security events and |

	incidents, and operate with an awareness of applicable policies, laws, and regulations.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	COMP-PROJECT+: Project+ Certification Boot Camp
Description:	The Project+ certification nowadays is largely considered a "PMP Lite." It's officially based on the PMBOK from PMI, but it's a much shorter test than the PMP, and it's often recommended for students who either don't have the needed hours of experience to qualify for the PMP, or who don't presently have the time to commit to the more demanding study required for the PMP.

The Project+ cert makes for a great "stepping-stone" to the PMP, as a much shorter test that is quicker and easier to pass. Students take the Project+ test, pass it, review their score-sheets, and then go on from there to study more and take the PMP test soon after. And some students who don't have the qualifying hours of experience for the PMP take both the Project+ and CAPM exams after this class, so they can add both certifications to their resume until later when they've accrued the works hours to go for their PMP.

Unitek Education's approach is to provide a thorough 5-day boot-camp that prepares students for either the PMP, CAPM, or Project+ certification, whichever is the right level for each student. |

	Our Education Coordinators can help you make the best decision about which level of PM certification is right for you. For specific details about our project management certification class, see the description of our 5-Day PMP Boot Camp, which also fully qualifies students for the CompTIA Project+ certification.
Location (On or Off-site):	Worldwide/Online

Course Name:	COMP-CASP: CompTIA Advanced Security Practitioner (CASP)

Description:	The CompTIA Advanced Security Practitioner (CASP) certification designates IT professionals with advanced-level security skills and knowledge.
	The CASP certification is an international, vendor-neutral exam that proves competency in enterprise security; risk management; research and analysis; and integration of computing, communications, and business disciplines.
	The exam covers the technical knowledge and skills required to conceptualize, design, and engineer secure solutions across complex enterprise environments. It involves applying critical thinking and judgment across a broad spectrum of security disciplines to propose and implement solutions that map to enterprise drivers.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	COMP-Healthcare: Healthcare IT Technician
Description:	The CompTIA Healthcare IT Technician certification covers the knowledge and skills required to implement, deploy, and support healthcare IT systems in various clinical settings.

The CompTIA Healthcare IT Technician certification exam covers:
• Regulatory requirements
• Organizational behavior
• IT operations
• Medical business operations
• Security |

	Potential candidates should possess a basic understanding of practice workflow while adhering to code of conduct policies and security best practices.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	COMP-CE: CompTIA Cloud Essentials
Description:	The CompTIA Cloud Essentials specialty certification demonstrates an individual knows what cloud computing means from a business and technical perspective, as well as what is involved in moving to and governing the cloud. The CompTIA Cloud Essentials exam covers: • Characteristics of cloud services from a business perspective • Business value of cloud computing • Technical perspective/cloud types • Steps to successful adoption • Impact and changes on IT service management • Risks and consequences
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	PMI: Project Management Professional (PMP) Boot Camp (No Vouchers)
Description:	According to the Project Management Institute, the world's leading association for the project management profession:

| | "PMP Certification is the profession's most globally recognized and respected certification credential. The PMP designation following your name tells current and potential employers that you have a solid foundation of project management knowledge that can be readily applied in the workplace. To be eligible for the PMP certification, you must first meet specific education and experience requirements and agree to adhere to a code of professional conduct. The final step in becoming a PMP is passing a multiple-choice examination designed to objectively assess and measure your project management knowledge."

Unitek Education's Advanced Project Management Skills for Success PMP boot camp is designed to provide the essential skills and knowledge needed to pass PMI's PMP exam. The PMP boot camp focuses on content from the Guide to the Project Management Body of Knowledge, Fourth Edition (PMBOK Guide) and includes practice exercises and quizzes as well as study and test-taking tips using PMI terminology. To be eligible for the PMP certification, you must first meet specific education and experience requirements. The PMP boot camp does not include the PMP credential exam. |

Course Name:	ITIL-FD-B: ITIL Foundation 2011 Boot Camp
Description:	The ITIL® Foundation course is the entry level certification course for IT Service

	Management Best Practices training in ITIL. This course covers the latest version of core ITIL best practices presented from a lifecycle perspective. The course introduces the principles and core elements of IT service management (ITSM) based on ITIL. ITIL is comprised of five core publications: Service Strategy, Service Design, Service Transition, Service Operations and Continual Service Improvement, promoting alignment with the business as well as improving operational efficiency.

This course is delivered using an exciting case study designed to further enhance and cement the candidates understanding of ITIL. Students who have attended this course are suitably prepared to successfully take the associated ITIL Foundation certification test which is a requirement for attending any of the further learning courses (ITIL intermediate level training) available in this track. |

Course Name:	NETAPP-CMESERIES: Configuring and Monitoring NetApp E- Series and EF-Series Storage Systems
Description:	In this course, you learn how to configure a new E-Series or EF-Series storage system and establish connectivity with a SAN. You use the SANtricity® storage management software and CLI to manage the E-Series and EF-Series controllers. You also use SANtricity storage management software features to restore data. Additionally, you learn how to support and monitor E-Series and EF- Series storage systems by performing

	various troubleshooting tasks, such as evaluating support data and using the built-in tools to identify storage system errors.
Location (On or Off-site):	Worldwide/Online
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP - CDOTDP 9.0: Clustered Data ONTAP 9.0 Administration and Data Protection 9.0
Description:	This course uses lecture and hands-on exercises to teach basic administration of an ONTAP cluster. In this course you configure and maintain a cluster. You practice working with ONTAP features and manage your storage and network resources using the cluster shell and OnCommand System Manager. In either case, brief lectures, hands-on exercises, and other activities are employed to teach the core technologies of ONTAP Data protection administration. The student will learn how to implement and manage SnapMirror, SnapVault, and SnapLock technology which are used to replicate and restore mission-critical data in the enterprise. The course also surveys real- world scenarios and use cases to teach students when to use each of the NetApp protection solutions. Backup and restore operations are taught using the command line and OnCommand System Manager.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-MCCIIW-REV01: ONTAP MetroCluster Installation
Description:	This course is an advanced course that focuses on installation, configuration and

	administration operations around MetroCluster as available in ONTAP 9.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-NCIESANCERT: NetApp Certified SAN Implementation Engineer Certification
Description:	Prepare for the NetApp Certified Implementation Engineer (NCIE) SAN exam NSO-502 for ONTAP 7-mode, or prepare for the NSO-504 exam for Clustered-ONTAP, with Unitek Education's NetApp Certified SAN Implementation Engineer Certification (NCIESANCERT) course. In this hands- on course, students will master SAN by exploring the intricacies of Fibre Channel (FC), FC over Ethernet (FCoE), and iSCI, through both labs and lectures.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-NASPAD: Managing NAS and Performance on Clustered Data ONTAP
Description:	Unitek Education's premier NASPAD training combines CIFS, NFS, and performance analysis topics into a single, in-depth one-week course. It provides the knowledge and skills that you need to administer CIFS version 1.x to 2.x and NFS versions 3, 4, and 4.1 in a clustered Data ONTAP® operating system. Learn the skills you need to collect and analyze performance data from NetApp® storage

	systems from a NetApp Authorized Learning Partner.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ONTAP: Data ONTAP 7-Mode Administration
Description:	Welcome to the NetApp® Data ONTAP® 7-Mode Administration course. Data ONTAP 8 is the next generation data storage operating system from NetApp. Data ONTAP 8.1 builds on the stability and reliability of the Data ONTAP 8 operating system and provides new functionality that sets it apart from all of the competition. This five-day instructor- led course enables you to perform basic support and administrative functions on a NetApp storage system running the Data ONTAP system operating in 7-Mode.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ONTAP-ANCDA: Accelerated NCDA Boot Camp Data ONTAP 7-Mode
Description:	Prepare for the NetApp Certified Data Management Administrator (NCDA) Data ONTAP 7-Mode exams. Through lectures and labs, learn about the features and functions of the NetApp® Data ONTAP® 7-Mode operating system and about network-attached storage (NAS) administration and SAN configuration.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ADMIN: Basic NetApp Configuration and Administration
Description:	Learn how to configure the basic technologies of the NetApp Data ONTAP® operating system—clustered Data ONTAP and Data ONTAP operating in 7-Mode. Through lectures and hands-on exercises, learn how to create aggregates, storage virtual machines (SVMs), virtual interfaces (VIFs), FlexVol® volumes, qtrees, Snapshot® copies, and more.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-CLUSTERED-NITE: NetApp@Nite - ONTAP Cluster Administration 9.0
Description:	In this course, you learn about the evolution of Data ONTAP clustering, use new features such as block protocols and System Manager 2.0, explore the benefits of scalability, discuss the architecture and functionality of a Data ONTAP cluster, and learn how to install, configure, manage, and troubleshoot a Data ONTAP cluster.
Location (On or Off-site):	Worldwide/Online
Length of Course:	10 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-FPDESIGN-REV01: Designing the FlexPod Solution

Description:	Designing the FlexPod Solution is a 2-day instructor-led course where you will learn to evaluate the FlexPod solution design process with regard to the contemporary data center challenges. The course provides a comprehensive understanding of the reconnaissance and analytics assess computing solution performance characteristics and requirements. In addition, this course will describe the hardware components of the FlexPod and the process for selecting proper hardware for a given set of requirements.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-FPIMPADM-REV01: Implementing and Administering the FlexPod Solution
Description:	FlexPod Implementation and Administration is a 3-day instructor-led course where you will learn to set up, configure, and administer the FlexPod architecture. The course provides a comprehensive understanding of the configuration requirements for FlexPod at the network, storage, and compute layers of the architecture. FlexPod can be used to deploy and manage internal, external, and cloud architectures. Centralized administration is achieved by using management tools such as Cisco UCS Director, NetApp Virtual Storage Console, and vCenter. These management tools are introduced and practical hands on labs are used to reinforce topics to learners.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-CCWWFA: Creating and Customizing Workflows Using OnCommand Workflow Automation
Description:	Discover how OnCommand Workflow Automation (OnCommand WFA) can help eliminate error-prone manual processes for storage management in your organization. In this course, you learn how to create and customize workflows to meet your organizational storage requirements. In addition, you create commands, finders, data sources, and functions. The course also provides an overview of the NetApp PowerShell Toolkit and how it integrates with OnCommand WFA.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ADMIN90: ONTAP Administration: What's New in ONTAP 9
Description:	In this course you will learn about the new features that are included in the ONTAP 9 Data Management Software release. You also configure many of these features with hands-on exercises using a lab environment that will be provided to you. This course is meant to update those that have taken the current Clustered Data ONTAP 8.3 administration courses. Note: This course does not cover fundamental or basic administration topics. A working knowledge of clustered Data ONTAP 8.3 is required.
Location (On or Off-site):	Worldwide/Online
Length of Course:	1 day
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-DATAPROT-REV07: ONTAP Data Protection Administration 9.0
Description:	This course can be delivered as an ILT or a vILT. In either case, brief lectures, hands-on exercises, and other activities are employed to teach the core technologies of ONTAP 9 Data protection administration. The student will learn how to implement and manage SnapMirror, SnapVault, and SnapLock technology which are used to replicate and restore mission-critical data in the enterprise. The course also surveys real-world scenarios and use cases to teach students when to use each of the NetApp protection solutions. Backup and restore operations are taught using the command line and OnCommand System Manager.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ONTAPADM: ONTAP Cluster Administration 9.0
Description:	This course uses lecture and hands-on exercises to teach basic administration of an ONTAP 9 cluster. In this course you configure and maintain a cluster. You practice working with ONTAP 9 features and manage your storage and network resources using the cluster shell and OnCommand System Manager. This three-day course is an intermediate course in a comprehensive learning path for customers, partners, and NetApp employees.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-SANARCH: Exploring SAN Architectures and Configurations (SANARCH)
Description:	Learn how to differentiate among the three SAN architectures that are available from NetApp: FAS SANs with the Data ONTAP operating system, E-Series SANs, and V-Series SANs.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-SIW: SAN Implementation
Description:	In this workshop course, you learn how to connect Windows® and Linux® hosts to NetApp® SANs via FC and iSCSI protocols.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-PAFC: Performance Analysis on Clustered Data ONTAP
Description:	This course provides you with the knowledge and skills that you need to collect and analyze system performance data from NetApp storage systems that are running clustered Data ONTAP. You learn how to interpret data and how to identify and implement changes that improve system efficiency. You also learn how to use system commands and

	features to monitor and enhance storage system performance using a combination of hands-on labs, case-studies, and technical discussion.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ONTAP-CIFS: Data ONTAP CIFS Administration
Description:	This course demonstrates how to administer CIFS version 1.0, 2.0, and 2.1 in Data ONTAP operating in 7-Mode and CIFS version 1.0, 2.0, 2.1, and 3.0 in clustered Data ONTAP.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ONTAP-NFS: Data ONTAP NFS Administration
Description:	This course covers how to administer NFS version 3 (NFSv3) and NFS version 4 (NFSv4) in Data ONTAP operating in 7- Mode and NFSv3, NFSv4, and NFS version 4.1 (NFSv4.1) in Data ONTAP operating in Cluster-Mode.
Location (On or Off-site):	Worldwide/Online
Length of Course:	1 day
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-SNAPPSAP: SnapProtect Solution Administration
Description:	This course prepares you to operate a NetApp® SnapProtect® CommCell with the following clients: NAS, Microsoft SQL,

	Microsoft Exchange, VMware® vCenter and other virtual server clients. The administrative best practices for trouble- free operation are emphasized throughout the course.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-OCIOBP: NetApp OnCommand Insight Operation and Best Practices
Description:	Learn how OnCommand Insight software manage and improve an organization's IT infrastructure and service management processes. This hands-on course explains the features and functions of the Insight suite of products and how they work together as a solution. You learn how Insight helps you use service policies to manage storage, plan for change, and use resources and capacity more effectively. You complete extensive exercises in which you use best practices and operational procedures to manage Insight. You also review and use data warehouse performance reporting features.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-OCIARC: OnCommand Insight: Advanced Report Creation with Report Studio
Description:	This course provides a technical deep dive on how to create highly customized reports from OnCommand Insight data warehouse using Report Studio.

	This course is 80% hands-on creating and customizing complex reports using Report Studio. It's designed to give the learner a solid, and deep technical hands- on experience with Report Studio that will enable them to start generating custom reports.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-OC-ADMIN: NetApp OnCommand Unified Manager Administration
Description:	Learn how to use NetApp® OnCommand® Unified Manager to centralize the deployment, automation, protection, and monitoring of your storage. Unified Manager can effectively and cost- efficiently monitor and manage physical, virtual, and shared storage infrastructures. Unified Manager enables you to optimize utilization, satisfy service- level agreements (SLAs), minimize risk, and increase performance.
Location (On or Off-site):	Worldwide/Online
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-AOCMCDOT: Administration of OnCommand Management Solutions for Clustered Data ONTAP
Description:	Discover how OnCommand® data management software lets you automate, analyze, and realize the effective, cost- efficient storage management that you need to succeed. In this course, you learn

	about OnCommand Unified Manager, management software that reduces complexity by using a unified approach to storage management. In this course, you also learn about the features and benefits of OnCommand Workflow Automation.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-EXCH: Implementing Microsoft Exchange on NetApp Storage Systems
Description:	Learn how to implement your Exchange 2010 solution on NetApp storage for maximum benefit. Learn the NetApp functionalities and storage efficiency capabilities that maximize your investment. In this course, you examine the elements of the Exchange 2010 solution on NetApp storage and discover how they operate together in your Exchange deployment. Through hands-on lab exercises, you learn how to back up and restore your Exchange solution using NetApp SnapManager for Exchange. You also learn to protect your Exchange data using NetApp SnapMirror and NetApp SnapVault, and how to utilize NetApp Single Mailbox Recovery software.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-MSSP: Implementing Microsoft SharePoint Server on NetApp Storage Systems

Description:	Learn how to implement your Microsoft® SharePoint® solution on NetApp storage for maximum benefit. In this course, you examine the components of the SharePoint solution on NetApp storage and explore how to configure the components for maximum benefit.
	Through hands-on exercises, you migrate SharePoint data to NetApp storage and leverage SnapManager® for SharePoint (SMSP) to back up and restore the data. You use Remote Blob Storage (RBS) to optimize the storage of SharePoint data on NetApp storage. You also recover and monitor data, and troubleshoot the SharePoint on NetApp solution.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-MSSQL: Implementing Microsoft SQL Server on NetApp Storage Systems
Description:	Learn to implement Microsoft® SQL Server 2012 on clustered Data ONTAP storage. This solution-based course focuses on Windows Server Failover Clustering, Microsoft SQL Server AlwaysOn Availability Groups, SnapDrive for Windows, and SnapManager for SQL Server. In this course, you will learn how to size and prepare clustered Data ONTAP storage virtual machines (also known as Vservers), install and configure SnapDrive for Windows, install and initialize SnapManager for SQL Server, move SQL databases to NetApp storage, backup and restore SQL databases, create Availability Groups, and troubleshoot common misconfigurations. By the end of this course, you will be able to confidently implement SQL Server 2012 on clustered Data ONTAP storage.

Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-ORACLE: Implementing Oracle on NetApp Storage Systems
Description:	This course provides instruction and hands-on practice to help you to learn how to implement an Oracle Database solution in a NetApp clustered Data ONTAP storage environment. In this class you practice discovering, planning, designing and provisioning an Oracle environment; install and configure an Oracle server; create an Oracle database; and use NetApp data management solutions to backup and restore your Oracle database.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-IMPMSHV: Implementing Microsoft Hyper-V on Data ONTAP
Description:	Learn how to implement Microsoft Hyper- V virtualization solutions on NetApp® Data ONTAP® 7-Mode and clustered Data ONTAP. In this course, you learn how to deploy the Microsoft® Windows® Server 2012 virtual infrastructure on Data ONTAP storage. The exercises use clustered Data ONTAP.
Location (On or Off-site):	Worldwide/Online
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	NETAPP-IMPVMVS: Implementing VMware vSphere on Data ONTAP
Description:	Learn how to implement VMware vSphere virtualization solutions on NetApp® Data ONTAP® 7-Mode and clustered Data ONTAP. In this course, you learn how to deploy VMware virtual infrastructure on NetApp storage. The exercises use clustered Data ONTAP.
Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-CCNA-Data-Center: Cisco Certified Network Associate (CCNA) Data Center Training Boot Camp
Description:	DCAA v1.0 is an extended hours bootcamp class designed to convey the knowledge necessary to understand and work with Cisco data center technologies. Covering the architecture, components and features of the Nexus, UCS and MDS product lines. You will gain practical experience in the configuration and operation of virtual Port Channels (vPCs), FabricPath, Overlay Transport Virtualization (OTV), and Fabric Extension (FEX). A current CCNA-RS, or commensurate knowledge, is a prerequisite for attendance. While the accelerated track is focused on a more hands on implementation based approach, the standard DCICN and DCICT is geared for a more introductory level of knowledge targeted for individuals who can perform only the more basic configuration tasks.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-CCNP-DC: CS-CCNP Data Center: Cisco Certified Network Professional (CCNP) Data Center Boot Camp
Description:	Get your CCNP Data Center certification in 14 Days with Unitek Education's CCNP Data Center boot camp. Our two week boot camp is taught by the finest Cisco instructors in the industry. Obtain valuable hands on training in our deluxe Cisco training labs. Get certified in less time. All-inclusive training package.
Location (On or Off-site):	Worldwide/Online
Length of Course:	14 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCUFD: Designing Cisco Data Center Unified Fabric (DCUFD)
Description:	Unitek Education's Designing Cisco Data Center Unified Fabric (DCUFD) v5.0 are practical, relevant, job-ready training courses aligned closely with the specific tasks expected of Data Center network professionals. Our Data Center courses are taught by experienced Cisco certified instructors using official Cisco curriculum. The hands-on training focuses on imparting data center unified computing and virtualization solutions that are based on the Cisco data center product portfolio. If you are a Systems and field engineers, technical solutions architects, Network designer, administrator, or have expertise in installing and implementing Cisco Nexus 7000 and 5000 Switches and the

	Cisco Nexus 2000 Fabric Extender, this training is a must for you.
	Unitek Education's Designing Cisco Data Center Unified Fabric (DCUFD) v5.0 course enables engineers to choose and design scalable, reliable and intelligent data center networks based on Unified Fabric, 10 Gigabit Ethernet, Fibre Channel, and virtualized devices and topologies.
	Our DCUFD 5.0 course is a 5-day instructor-led course (ILT) The course describes the technologies used in modern Cisco-based data centers, ways of integrating components, and latest guidelines and principles on data center design.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCUCD: Data Center Unified Computing Design (DCUCD)
Description:	Unitek Education's Cisco Data Center training courses are practical, relevant, job-ready training courses aligned closely with the specific tasks expected of Data Center network professionals.
	Our Data Center courses are taught by experienced Cisco certified instructors using official Cisco curriculum. The hands-on training focuses on imparting data center unified computing and virtualization solutions that are based on the Cisco data center product portfolio. If you are a Data Center designer, administrator, engineer or manager, this training is a must for you.

	The course explains how to evaluate existing data center computing solution, determine the requirements and design Cisco data center unified computing and virtualization solutions. The Cisco Data Center Unified Computing Design training course validates an engineer's ability to design scalable, reliable, and intelligent Data Center Virtualization solutions based on the Cisco Unified Computing System (UCS) along with other Cisco Data Center products, server virtualization software, and server operating systems.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCUCI: Data Center Unified Computing Implementation (DCUCI)
Description:	Implementing Cisco Data Center Unified Computing (DCUCI) is designed to serve the needs of engineers and technicians who implement Cisco Unified Computing System (UCS) B-Series Blade Servers and Cisco UCS C-Series Rack-Mount Servers. DCUCI v5.0 guides learners through rack installation and provisioning of server hardware, operating systems, hypervisors, and applications. Much of the content is devoted to management and maintenance. DCUCI v5.0 covers the implementation and operation of Cisco UCS in the data center.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCUFI: Implementing Cisco Data Center Unified Fabric (DCUFI)
Description:	The Implementing Cisco Data Center Unified Fabric (DCUFI) v5.0 is a five-day instructorled training course designed for Systems and Field Engineers, Consulting Systems Engineers, Technical Solutions Architects, and Cisco Integrators and Partners who install and implement the Cisco Nexus 7000 and 5000 Series switches and the Cisco Nexus 2000 Series Fabric Extenders. This course covers the key components and procedures needed to install, configure, and manage the Cisco Nexus 7000, 5000, 2000, and MDS Series switches in the network and SAN environment.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCICN: Introducing Cisco Data Center Networking (DCICN)
Description:	DCICN will introduce the students to the three primary technologies that are used in the Cisco Data Center. The introductory level of knowledge that is taught in the course is targeted for individuals that will perform only the more basic configuration tasks. The course labs will focus on viewing configurations, but not on making configuration changes or creating new topologies.
Location (On or Off-site):	Worldwide/Online
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCICT: Introducing Cisco Data Center Technologies (DCICT)
Description:	DCICN and DCICT will introduce the students to the Cisco technologies that are deployed in the Data Center: unified computing, unified fabric, and network services. The introductory level of knowledge that is taught in these courses is targeted for individuals who can perform only the more basic configuration tasks. The course labs will focus on verifying configurations, with selected exercises involving making configuration changes or designing new topologies.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCNX1K: Configuring the Cisco Nexus 1000V (DCNX1K)
Description:	Configuring the Cisco Nexus 1000V is a three-day instructor-led training program designed for systems and field engineers who install and implement the Cisco Nexus 1000V Switch. The course covers the key components and procedures you need to know to install, configure, manage, and troubleshoot the Cisco Nexus 1000V Switch. Version 2.0 of this course is an update that covers the feature differences between version 4.2(1)SV1(4a) and version 4.2(1)SV1(5.1). Labs and Courseware are updated in this version of the course. Additionally time is spent discussing the highlights of emerging features of the Cisco Nexus 1000V.

Location (On or Off-site):	Worldwide/Online
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-DCNX5K: Configuring Cisco Nexus 5000 Switches (DCNX5K)
Description:	Unitek Education's Configuring Cisco Nexus 5000 Switches (DCNX5K) v 2.0 is the second iteration of the DCNX5K course, with significant differences to the course structure, labs, and content. DCNX5K v2.0 is intended to be a lab focused product course. The course focuses on the key components and procedures needed to install, configure, manage and troubleshoot the Cisco Nexus 5000 switch in the network and SAN environment. The course has been restructured as a lab-centric course, with 2/3 of a student's overall class time that is expected to be spent performing labs. This timing provides approximately 3-4 hours of lab content and only 2-3 hours of lecture content per ILT class day. It is expected that technology concepts are off-loaded to prerequisites. The course structure is based on the Cisco Configuration Guides. Each module, as much as possible, is independent of any other module. The labs need to be able to be performed by one student configuring a complete pod for virtual training purposes. The labs must be scalable to two people per pod in an ILT delivery. Each lab exercise is independent of previous labs. There is a requirement for

	configurations scripts and a reset procedure to establish a given lab's context before the student performs any lab exercise or activity. Each lab exercise must be restricted to the student's own pod environment and be independent of other student pod activities. There are no labs requiring pod-to-pod configuration or cooperation. Every effort was made to base the DCNX5K v2.0 lab topology on the existing DCNX5K v1.0 lab topology. Using this topology minimizes changes to hardware and software and facilitates Cisco Learning Partner adoption.

Course Name:	CS-DCUCS: Configuring Data Center Unified Computing (DCUCS)
Description:	Unitek Education's Configuring Data Center Unified Computing course addresses the needs of engineers implementing Cisco UCS B-Series blade servers and Cisco UCS C-Series rack servers. There is significant content devoted to management, maintenance and troubleshooting. The Configuring Data Center Unified Computing course articulates Cisco Data Center virtualization solutions and explains how to execute a virtualization solution on Cisco UCS B-series and C-series hardware. This course will address the configuration and ongoing maintenance of Cisco UCS B-Series and C-Series servers with a strong emphasis on Cisco UCS B Series blade servers. New features of the Cisco UCS 2.0 code

	version are also addressed with additional information provided on the new hardware additions to the Cisco UCS portfolio including the Cisco 6248 and 6296 Fabric Interconnects, 2204 and 2208 I/O Modules and 1240 and 1280 Virtual Interface cards.

Course Name:	CS-CCNA: Cisco Certified Network Associate (CCNA) Routing and Switching Training Boot Camp v3.0
Description:	Unitek Education's CCNA Routing and Switching Boot Camp is one of the most in-demand and popular CCNA certification training in the nation. It is our guarantee that you will get certified in less

	time, for less money and gain hands-on experience which you will take back to your job. Our certified and experienced Cisco instructors work with you to train you in ICND1 and ICND2 skills to get you certified as a Cisco Certified Network Associate (CCNA). Our accelerated boot camp style training has revolutionized the IT training industry and after more than twenty years has become the top of the industry standard. Unitek Education's training teams are recognized as trailblazers that have revolutionized the way IT is taught and absorbed. For our students this means world-class training that keeps you engaged, challenged, and entertained all from the best Cisco certified training team your training dollars can buy.

Course Name:	CS-CCNP-RS: Cisco Certified Network Professional (CCNP) Training Boot Camp
Description:	Unitek Education offers the finest accelerated CCNP training available.The CCNP certification validates a network professional's ability to install, configure and troubleshoot converged local and wide area networks with 100 to 500 or more nodes. Network Professionals who achieve the CCNP certification have demonstrated the knowledge and skills required to manage the routers and switches that form the network core, as well as edge applications that integrate voice, wireless, and security into the network. Get CCNP certified in less time, for less money, and gain real hands-on networking experience. Learn, not cram,

	using high-end Cisco equipment, in the best-equipped training lab! Two weeks of intense training from Cisco certified industry experts, for an unbelievably low, all-inclusive price.

Course Name:	CS-ICND2: Interconnecting Cisco Networking Devices Part 2 (ICND2) v3.0

Description:	Interconnecting Cisco Networking Devices Part 2 (ICND2) v1.1 is an instructor-led course that is presented by Cisco Learning Partners to their end-user customers. This five-day course focuses on using Cisco Catalyst switches and Cisco routers that are connected in LANs and WANs typically found at medium- sized network sites. Upon completing this training course, you should be able to configure, verify, and troubleshoot the various Cisco networking devices in a small network environment. This course is often taught as part of the Cisco Certified Network Associate (CCNA) Routing and Switching Training Boot Camp v2.0.

Course Name:	CS-DCMDS: Configuring Cisco MDS 9000 Series Switches (DCMDS) V2.0
Description:	Configuring Cisco MDS 9000 Series Switches (DCMDS) v2.0 is an instructor- led five-day product training course that is designed as a comprehensive hands-on experience to familiarize data center systems engineers, field engineers, architects, and Cisco partners who implement storage-networking solutions with the Cisco MDS 9000 Series switch platform. This course covers features on each of the MDS 9000 Series product family of switches including the 9100, 9200, 9500, and 9700 models and the Fibre Channel, Fibre Channel over Ethernet (FCoE), and service modules supported. Fundamental topics include 8-Gbps Fibre Channel, 16-

	Gbps Fibre Channel, Fibre Channel over IP (FCIP), multihop FCoE, upgrading the Cisco NX-OS, and the common management tool Cisco Prime Data Center Network Manager (DCNM). The course provides comprehensive SAN configuration for features such as interface configuration, Cisco N-Port Virtualizer (NPV), N-Port ID Virtualization (NPIV), virtual SAN (VSAN) and domain setup, SAN zoning, and SAN extension using FCIP and Inter-VSAN Routing (IVR). Topics introduced also include centralized SAN services using the Cisco MDS 9222i Multiservice Modular Switch and Cisco MDS 9250i Multiservice Fabric Switch for Cisco I/O Acceleration (IOA) and Cisco Data Mobility Manager (DMM), management security and role-based access control (RBAC) topics. The goal of this course is for students to learn how to install, configure, and manage the Cisco MDS 9000 Series switch platform in a scalable, highly available environment.

Course Name:	CS-CCNA+CCDA: CCENT + CCNA + CCDA Triple Certification Training Boot Camp
Description:	Unitek Education's premier CCENT+CCNA+CCDA training program you will get hands-on training in key concepts such as how to install, configure and operate LAN, WAN and dial access services, troubleshooting, network layer addressing, network sizing, filtering with access list, VLAN use and propagation and improved network security. The Cisco Certified Entry Networking Technician (CCENT) training component of this training gets you trained in skills required for entry-level network support positions. As the first step towards a successful networking career, the CCENT certification will give you the hands-on expertise to gain valuable experience in a

	networking position and get you on the path of a CCNA certification.
	The Cisco Certified Network Associate (CCNA) training component gives you the hands-on routing and switching skills and prepares you for the ICND1 and ICND2 exam.
	The Cisco Certified Design Associate (CCDA®) training component of this course will validate your knowledge in designing a Cisco converged network. With a CCDA certification, you will demonstrate skills required to design routed and switched network infrastructures and services involving LAN, WAN, and broadband access for businesses and organizations.
	Our accelerated boot camp style training has revolutionized the IT training industry and after more than twenty years has become the top of the industry standard. Unitek Education's training teams are recognized as trailblazers that have revolutionized the way IT is taught and absorbed. Course Name:	CS-CICD: Implementing Cisco Collaboration Devices (CICD)
Description:	This course focuses on providing the skills and knowledge necessary to implement Cisco Unified Communications (UC) solutions. It covers administration of end-user interfaces, telephony and mobility features, and Cisco UC solutions maintenance. A new type of lab called a Discovery lab is introduced. Discovery labs are a learning environment, embedded in the lessons, that enables students to learn about principles and technology in a more interactive, hands- on way. The course also contains Challenge labs. Challenge labs are labs where students test their knowledge gained through a lesson or multiple lessons. After successful completion of this course, the student will be able to: • Describe the components of a Cisco Unified Communications solution and identify call signaling and media stream flows • Provide an overview of administrator and end-user interface options in Cisco Unified Communications Manager, Cisco Unified Communications Manager Express, Cisco Unity Connection, and Cisco Unified Communications Manager IM and Presence Service. Understand call flows in Cisco Unified Communications

	Manager and Cisco Unified Communications Manager Express
	- Perform endpoint and end-user administration tasks in Cisco Unified Communications Manager and Cisco Unified Communications Manager Express - Describe the telephony features supported in Cisco Unified Communications Manager and Cisco Unified Communications Manager Express - Administer users in Cisco Unity Connection and Cisco Unified Communications Manager IM and Presence Service, and enable the most commonly used features for both applications - Describe how to maintain a Cisco Unified Communications solution

Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	CS-CCNP-Sec: 14-Day Official CCNP Security + CCNA Security Dual-Certification Boot Camp
Description:	Unitek Education's CCNP Security Training Boot Camp is a Dual Certification program which is practical and relevant. The job-ready certification curriculum is aligned closely with the specific tasks expected of these highly demanded professionals. Cisco realizes that the role of the network security engineer is tasked with increased focus on configuration responsibilities as the

technical consultant and device specialist on a security team; therefore, this 14-Day Boot Camp is specific to the best practices of the network security engineers using the latest Cisco equipment, devices, and appliances.

The CCNP Security certification program is aligned specifically to the job role of the Cisco Network Security Engineer responsible for Security in Routers, Switches, Networking devices and appliances, as well as choosing, deploying, supporting and troubleshooting Firewalls, VPNS, and IDS/IPS solutions
for their networking environments.

Course Name:	CS-SENSS: Implementing Cisco Edge Network Security Solutions (SENSS) 1.0
Description:	Implementing Cisco Edge Network Security Solutions (SENSS) v1.0 is a newly created five-day instructor-led training course that is part of the curriculum path leading to the Cisco Certified Network Professional Security (CCNP Security) certification. Additionally, it is designed to prepare security engineers with the knowledge and hands-on experience to prepare them to configure Cisco perimeter edge security solutions utilizing Cisco Switches, Cisco Routers, and Cisco Adaptive Security Appliance (ASA) Firewalls. The goal of the course is to provide students with foundational knowledge and the capabilities to implement and managed security on Cisco ASA firewalls, Cisco Routers with the firewall feature set, and Cisco Switches. The student will gain hands-on experience with configuring various perimeter security solutions for mitigating outside threats and securing network zones. At the end of the course, students will be able to reduce the risk to their IT infrastructures and applications using Cisco Switches, Cisco ASA, and Router security appliance feature and provide

	detailed operations support for these products.

Course Name:	CS-SASAA: Implementing Advanced Cisco ASA Security
Description:	This course provides updated training on the key features of the Cisco ASA, including the ASA FirePOWER Services Module and ASA Clustering. The main changes in SASAA v2.0 compared to SASAA v1.2 include updating the ASA release to 9.4.1. Added new content in the student guide and a new lab to cover some of the new ASA 9.3 and 9.4.1 features, and added content in the student guide on the new ASA 5506-X, 5508-X, and 5516-X. Also made few minor edits in the other modules. The ASA FirePower Services Module coverage is still based on the FirePOWER 5.3.1 software version in

	SASAA v2.0. The optional modules, like the end of life ASA CX, has been removed in SASAA v2.0.

Course Name:	CS-SISE: Implementing and Configuring Cisco Identity Services Engine
Description:	Implementing and Configuring Cisco Identity Services Engine (SISE) v1.3 is a 5-day ILT training program designed for ATP partner systems and field engineers, consulting systems engineers, technical solutions architects, and Cisco integrators who install and implement the Cisco Identity Service Engine version 1.3. The course covers the key components and procedures needed to install, configure, manage, and troubleshoot the Cisco Identity Services Engine version 1.3. This course is primarily a Cisco ATP Partner training replacement course for Implementing and Configuring the Cisco Identity Services Engine (SISE) v1.1. In addition to the normal content covered in the SISE v1.3 course, Skyline ATS has added several enhancements. Enhanced Real World BYOD lab exercises using Mobile Devices (Apple iPads) has also been added. In addition to the BYOD enhancements, Real World lab exercises covering MAB, 802.1x-Wired, 802.1 x- Wireless, Web Authentication, Posture Assessment, & Profiling are also included.

Course Name:	CS-CCNA-Data-Center: Cisco Certified Network Associate (CCNA) Data Center Training Boot Camp
Description:	DCAA v1.0 is an extended hours bootcamp class designed to convey the knowledge necessary to understand and work with Cisco data center technologies. Covering the architecture, components and features of the Nexus, UCS and MDS product lines. You will gain practical experience in the configuration and operation of virtual Port Channels (vPCs), FabricPath, Overlay Transport Virtualization (OTV), and Fabric Extension (FEX). A current CCNA-RS, or commensurate knowledge, is a prerequisite for attendance. While the accelerated track is focused on a more hands on implementation based approach, the standard DCICN and DCICT is geared for a more introductory level of knowledge targeted for individuals who can perform only the more basic configuration tasks.

Course Name:	MS-MCSA-Cloud: MCSA: Cloud Platform Boot Camp
Description:	Azure is the cloud for modern business. If you're already experienced with Azure, you can expand your skills to meet future business needs with two Specialist certifications. This Boot Camp offers students the opportunity to take an existing ASP.NET MVC application and expand its functionality as part of moving it to Azure. This course focuses on the considerations necessary when building a highly available solution in the cloud. This Boot Camp is also aimed at experienced IT Professionals who currently administer their on premise infrastructure. The Boot Camp introduces the student to Microsoft Azure and then teaches them how to manage their infrastructure in Azure rather than on premise.
Location (On or Off-site):	Worldwide/Online
Length of Course:	6 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	MS-20532: Developing Microsoft Azure Solutions
Description:	This course is intended for students who have experience building vertically scaled applications. Students should also have experience with the Microsoft Azure platform and a basic understanding of the services offered in Azure.

	This course offers students the opportunity to take an existing web application and expand its functionality as part of moving it to Azure. The course does not require any existing experience with the ASP.NET platform. This course focuses on the architectural considerations and decisions necessary when building a highly available solution in the cloud. This course also prepares the students for the 70-532: Developing Microsoft Azure Solutions certification exam.

Course Name:	MS-10979: Microsoft Azure Fundamentals
Description:	Get hands-on instruction and practice implementing Microsoft Azure in this two day Microsoft Official Course. You will be presented with Basic cloud computing concepts as well as specific Microsoft Azure features used in day to day administration of cloud resources. You will learn key Microsoft Azure concepts and basic implementation of Azure subscriptions, websites, virtual machines, storage, virtual networks, databases and Microsoft Azure Active Directory. This course is intended for information technology (IT) professionals who have a limited knowledge of cloud technologies and want to learn more about Microsoft Azure. This course provides the underlying knowledge required by all IT professionals who will be using Microsoft Azure, regardless of whether they are an administrator, developer, or database administrator. While this course does not map to an exam, it does provide you with the prerequisite knowledge for taking 20532A:Developing Microsoft Azure Solutions & 20533A:Implementing Microsoft Azure Infrastructure Solutions.

Course Name:	MS-CRM-2013: MS: Dynamics CRM 2013 Boot Camp
Description:	Unitek Education's Microsoft Dynamics 2013 Boot Camp provides professionals from IT to management hands-on experience to develop their skills in installing, deploying, configuring Microsoft Dynamics CRM, as well as exploring the different capabilities available for Sales Management and Customer Service. The different Microsoft Dynamics certifications validate the knowledge and skills associated with implementing and managing CRM software for a wide range

	of organizations and departments, as well as specific skills required for sales and customer service environments. Microsoft Exchange 2013 powers the new version of Office, making it easy for people to stay connected, access files any time, and maintain messaging security. Unitek Education's Microsoft Dynamics Boot Camp provides a hands-on experience with Installation and Deployment in Microsoft Dynamics CRM 2013 (MS-80539A) and Customization and Configuration in Microsoft Dynamics CRM 2013 (MS-80542A) along with Customer Service in Microsoft Dynamics CRM 2013 (80545A) and Sales Management in Microsoft Dynamics CRM 2013 (80546A). This boot camp includes the three associated exams. As part of the training, our boot camp schedule includes a review session which covers key material, providing a comprehensive preparation for each of the exams. Our CRM students rave about this component of our training program as it helps summarize and reinforce important takeaways.

Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	MS-6293: Troubleshooting and Supporting Windows 7 in the Enterprise
Description:	This course is designed for Information Technology (IT) professionals who have experience with Windows XP and Windows Vista who work as Windows 7 Enterprise Desktop Support Technicians (EDSTs) in Tier 2 support environments. The goal of this training is to enable these individuals to support the Windows 7 operating system and solve technical troubleshooting problems in a Windows 7 and Windows Server 2008 R2 networking environment. This course helps candidates prepare for Exam 70-685, the final requirement for

| | the Enterprise Desktop Support Technician (EDST) professional credential.

By the course's end, students will have been exposed to the process of establishing and using a troubleshooting methodology, and the EDST job role and responsibilities. Additionally, students will be exposed to various troubleshooting tools and techniques that enable them to address the following Windows 7 issues in an enterprise network environment:
• Startup
• Group Policy
• Hardware and device driver
• Performance
• Network connectivity
• Remote connectivity
• User profile and logon
• Security
• Applications |

Course Name:	MS-20687: Configuring Windows 8.1
Description:	This course provides students hands-on experience with Windows 8.1. It provides guidance on installing, upgrading, and licensing for Windows 8.1. Students will learn how to manage storage by creating simple, spanned, and striped volumes, and how to optimize file-system performance. Additionally, they will learn how to manage available disk space by using quotas. Students will work with Windows tools and services to determine the source of performance and reliability issues, and to troubleshoot these issues. This course describes how to configure networking to include IPv4, IPv6, connect to wireless networks, and use the networking features included in Windows 8.1 to troubleshoot networking issues. Students will also learn preventive measures and tools that work together to protect their computers from security threats. The course then covers the features related to file and folder management, which include setting permissions, file/folder compression, and configuring shared folders. Students will also learn about installing and managing printers.

	Additionally, the course provides an overview of the SkyDrive functionality, and describes the procedures to install and configure applications, including Windows Store apps.
	The course also examines the fundamentals of working with virtual machines in the Client Hyper-V environment in Windows 8.1.
	Students will learn about features such as Virtual Private Networks (VPNs) and DirectAccess, which provide mobile users access to internal resources when the users are out of the office.
	Throughout the course, students will use Windows PowerShell 3.0, and its graphical user interface (GUI) to configure and manage the system. Students will also use the scripting editor to create and examine PowerShell scripts used to manage the system.

Course Name:	MS-20247: Configuring and Deploying a Private Cloud
Description:	This course equips students with the skills they require to configure and deploy a cloud using Microsoft System Center 2012 R2. Using hands-on labs, students learn the following: - Produce a high-level design that accounts for requirements for cloud environments. - Configure and deploy the cloud fabric. - Configure a PXE server, an update server, and a software update baseline. - Configure Microsoft Server Application Virtualization (App-V) so that it can be used to sequence and deploy an application virtually. - Build the core components necessary for delivering services on the fabric. - Allocate resources to a cloud and grant access to a cloud.

	- Understand how to monitor clouds using Operations Manager. - Understand the tools necessary to extend and customize Operations Manager for cloud environments. - Set up, configure, and integrate the core components of Service Manager into a cloud fabric. - Configure a service catalog, and then publish it to the Self-Service Portal. - Gain the knowledge necessary to deploy and configure Data Protection Manager in a cloud. - Deploy and configure Orchestrator in a cloud, and then integrate it with other System Center components.

Course Name:	MS-MCSE-Messaging: MCSE: Messaging (Exchange 2013) Boot Camp
Description:	Unitek Education's Microsoft Certified Solutions Expert (MCSE): Messaging Boot Camp provides IT professionals hands-on experience to develop their skills in planning, deploying, supporting, maintaining, and optimizing IT infrastructures. The MCSE: Messaging certification validates the knowledge and skills associated with performing as the lead engineer for messaging solutions within an enterprise organization, as well as the ability to design and deploy messaging solutions with Microsoft Exchange Server 2013. Microsoft Exchange 2013 powers the new version of Office, making it easy for people to stay connected, access files any time, and maintain messaging security.

	Unitek Education's MCSE: Messaging (Exchange 2013) Boot Camp provides a hands-on experience with Core Solutions of Microsoft Exchange Server 2013 (MS- 20341A) and Advanced Solutions of Microsoft Exchange Server 2013 (MS- 20342A). This boot camp includes the two exams needed for certifications. As part of the training, our boot camp schedule includes a review session which covers key material, providing a comprehensive preparation for each of the exams. Our Exchange Server students rave about this component of our training program as it helps summarize and reinforce important takeaways.

Course Name:	MS-20339-1: Planning and Administering SharePoint 2016
Description:	This five-day course will provide you with the knowledge and skills to plan and administer a Microsoft SharePoint 2016 environment. The course teaches you how to deploy, administer, and troubleshoot your SharePoint environment. This course also provides guidelines, best practices, and considerations that help you optimize your SharePoint deployment. This is the first in a sequence of two courses for IT professionals and is aligned with the SharePoint 2016 IT Pro certification.
Location (On or Off-site):	Worldwide/Online
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Authorized Learning Partner

Course Name:	MS-20339-2: Advanced Technologies of SharePoint 2016
Description:	This five-day course will teach you how to plan, configure, and manage the advanced features in a SharePoint 2016 environment. The special areas of focus for this course include implementing high availability, disaster recovery, service application architecture, and Microsoft

Business Connectivity Services. This course also focuses on social computing features, productivity, and collaboration platforms and features. Students also will learn about business intelligence solutions, Enterprise Content Management, web content management infrastructure, solutions, and apps. This course also covers how to develop and implement a governance plan, and how to perform an upgrade or a migration to SharePoint 2016.

This is the second in a sequence of two courses for IT Professionals and is aligned with the SharePoint 2016 IT Pro certification.

Course Name:	MINT-Medical Imaging Network Training
Description:	Efficiently dealing with the vast amount of images in the medical field has become increasingly difficult. The manual process of putting records on films is now being replaced with digital imaging. Digital Imaging and Communications in Medicine (DICOM) is a standard for handling, storing, printing, and transmitting information in medical imaging. It includes a file format definition and a network communications protocol. This standard requires training and that's why Unitek Education has created MINT – Medical

	Imaging and Network Training. We're exclusively offering this comprehensive course to get you up to speed. The use of Digital Imaging makes it a much easier to create, store, print, retrieve and archive digital images like MRIs, CAT scans and X-rays. Patients' records are now updated more efficiently, securely and compliant with HIPAA regulations.

Description:	ITIL® 2011 edition is comprised of five core publications: Service Strategy, Service Design, Service Transition, Service Operations and Continual Service Improvement, promoting alignment with the business as well as improving operational efficiency. The official ITIL® qualification scheme describes two streams, the Service Lifecycle Stream and the Service Capability stream. The ITIL® MALC (Managing Across the Lifecycle) course offers candidates the ability to achieve the ITIL Expert certification upon passing the ITIL® Managing Across the Lifecycle exam. The course prepares candidates to take the ITIL® Managing Across the Lifecycle Intermediate exam as well as proving valuable knowledge that can be implemented in the workplace. This certification completes the ITIL® Intermediate Lifecycle and Capability streams by focusing on the knowledge required to implement and manage the necessary skills associated with the use of the Service Lifecycle.

training courses if required:	

Course Name:	Monitoring and Operating a Private Cloud - MS-20246
Description:	This course describes how to monitor and operate a cloud with Microsoft® System Center 2012 R2. This course focuses on how to manage and administer a cloud environment, and it describes how you can monitor key infrastructure elements and applications that run within a cloud. It does not discuss planning and implementation, which is covered in 20247: Configuring and Deploying a Cloud with System Center 2012 R2.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Configuring and Deploying a Private Cloud - MS-20247
Description:	This course equips students with the skills they require to configure and deploy a cloud using Microsoft System Center 2012 R2. This course is often taught as part of the FastTrack to MCSE Cloud Platform and Infrastructure through Private Cloud Boot Camp.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Installing and Configuring Windows Server 2012 R2 - MS-20410
Description:	Unitek Education's Installing and configuring Windows Server 2012 training helps you get hands-on instruction and practice installing and configuring Windows Server 2012, including Windows Server 2012 R2, in this five-day Microsoft Official Course. This course is part one in a series of three courses that provides the skills and knowledge necessary to implement a core Windows Server 2012 infrastructure in an existing enterprise environment.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Administering Windows Server 2012 R2 - MS-20411

Description:	The three courses collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server 2012 environment. Although there is some cross-over of skills and tasks across these courses, this course focuses on the administration tasks necessary to maintain a Windows Server 2012 infrastructure such as configuring and troubleshooting name resolution, user and group management with Active Directory Domain Services (AD DS) and Group Policy, implementing Remote Access solutions such as DirectAccess, VPNs and Web Application Proxy, implementing Network Policies and Network Access Protection, Data Security, deployment and maintenance of server images, as well as update management and monitoring of Windows Server 2012 environments.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Configuring Advanced Windows Server 2012 R2 Services - MS-20412
Description:	The three courses collectively cover implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server 2012 environment. Although there is some cross-over of skills and tasks across these courses, this course focuses on advanced configuration of services necessary to deploy, manage and maintain a Windows Server 2012 infrastructure, such as advanced networking services, Active Directory Domain Services (AD DS), Active Directory Rights Management Services (AD RMS), Active Directory Federation Services (AD FS), Network Load Balancing, Failover Clustering, business continuity and disaster recovery services as well as access and information provisioning and protection technologies such as Dynamic Access Control (DAC), and Web Application Proxy integration with AD FS and Workplace Join.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Designing and Implementing a Server

	Infrastructure - MS-20413
Description:	Unitek Education is offering a five-day, instructor-led course on Designing and Implementing a Server Infrastructure. This course will equip you with the necessary knowledge to plan, design, and deploy a physical and logical Windows Server 2012 Active Directory Domain Services (AD DS) infrastructure. This course is often taught as part of the FastTrack to MCSE Cloud Platform and Infrastructure through Server Infrastructure Boot Camp.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Implementing an Advanced Server Infrastructure - MS-20414
Description:	nitek Education is offering a five-day course on Implementing an Advanced Server Infrastructure. In this course, our experience trainers will teach you how to plan and implement some of the more advanced features available in Windows Server 2012. This course is often taught as part of the FastTrack to MCSE Cloud Platform and Infrastructure through Server Infrastructure Boot Camp
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	yes

Course Name:	VMware Virtual SAN: Deploy and Manage [V5.5]
Description:	his training course focuses on deploying and managing a software-defined storage solution with VMware® Virtual SAN™ 5.5. This course looks at how Virtual SAN is used as an important component in the VMware® software-defined data center (SDDC). Students gain practical experience with these concepts through the completion of hands-on labs. The course is based on the VMware® ESXi™ 5.5 Update 1 and the VMware® vCenter Server™ 5.5 Update 1.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware View:Design Best Practices
Description:	This course presents a methodology for designing a VMware&read; View™ solution for the VMware vSphere&read; infrastructure. The design methodology includes recommendations for the type of information and data that must be gathered and analyzed to make sound design decisions for client systems, desktop options, the vSphere infrastructure, and View components. VMware best practices are presented during each phase of the design process. You will work with other participants to design a View solution for a real-world project.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware View: Desktop Fast Track [V5.1]
Description:	This hands-on training course builds your skills in the VMware® View™ suite: VMware® View Manager™, VMware® View Composer™, and VMware® ThinApp®. The course provides applications-oriented administrators with the knowledge and skills to virtualize Windows applications with ThinApp and to choose the best deployment and updating processes for their environment. The course also presents a methodology for analyzing and designing a View solution for the VMware® vSphere® infrastructure.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Horizon (with View): Install, Configure, Manage V6.0
Description:	VMware Horizon™ 6 (with View) delivers virtualized and remote desktops and applications through a single platform and supports end users with access to all of their Windows and online resources through one unified workspace
This hands-on training course builds your skills in installing, configuring, and managing the Horizon™ View™ component of VMware Horizon™. Students gain practical experience with these concepts through the completion of hands-on labs. View includes: VMware View®

	Manager™, VMware View® Composer™, and View security server. This course is based on the Horizon 6 release.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware Mirage: Install, Configure, Manage [V5.0]
Description:	This hands-on training course provides students with skills that they need to deploy a unified image management system using VMware Mirage™. After installing Mirage 5.0, students learn how to configure security, manage images, perform a Windows migration, set up endpoint protection, and perform various management functions.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCenter Configuration Manager: Install, Configure, Manage [V5.7]
Description:	Overview: This hands-on training course focuses on installing, configuring, and managing VMware vCenter Configuration Manager™ 5.7. The course is built on VMware ESXi™ and VMware vCenter Server™. This course provides you with the knowledge and skills to install and configure vCenter Configuration Manager, navigate the user interface, manage compliance, and perform administrative and configuration tasks against your infrastructure.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCenter Configuration Manager for Operating Systems Management V5.x
Description:	This hands-on training course extends your skills with VMware vCenter Configuration Manager (VCM). It will extend the knowledge that you gained in the VMware vCenter Configuration Manager for Virtual Infrastructure Management course and give you skills to enable configuration of VCM for management of physical and virtual guest operating systems and Active Directory

	(AD), create and use compliance templates, use VCM for patching, deploy operating systems and Windows software applications, and use VCM tools to download, import, and export compliance templates, and view and collect debugging information.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCenter Configuration Manager for Virtual Infrastructure and OS Management [V5.x]
Description:	This hands-on training course builds your skills with VMware® vCenter Configuration Manager™. It provides you with the knowledge and skills to install and configure vCenter Configuration Manager, navigate the user interface, manage compliance, and perform administrative and configuration tasks against your physical and virtual infrastructure. You learn how to manage Active Directory (AD), create and use compliance templates, use vCenter Configuration Manager for patching, deploy operating systems and Windows software applications, and use vCenter Configuration Manager tools to download, import, and export compliance templates, and view and collect debug information.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCenter Operations Manager:Analyze and Predict
Description:	This course for experienced users of VMware® vSphere® teaches skills in the use of VMware® vCenter™ Operations Manager™ as a forensic and predictive tool. The course is based on VMware ESXi™ 5.x, VMware® vCenter Server™ 5.x, and vCenter Operations Manager 5.x.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCenter Site Recovery Manager: Install, Configure, Manage V5.8

Description:	This two-day, hands-on training course equips experienced VMware vSphere administrators with the knowledge to install, configure, and manage VMware vCenter Site Recovery Manager 5.8. This course also equips vSphere administrators with the knowledge to assist in writing and testing disaster recovery plans that use vCenter Site Recovery Manager.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCenter Operations Manager: Advanced Usage and Dashboard Design
Description:	In this course, you will focus on the advanced capabilities of VMware® vCenter™ Operations Manager™ 5.6, including adapters, customization, and management topics. You will learn how to use adapters, define custom super metrics, customize dashboards, and use the custom user interface. This course is based on vCenter Operations Manager 5.6 and integration with VMware vSphere® 5.1, VMware vCloud Director® 5.1, and VMware vFabric™ Hyperic®.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMWare vCloud Director: Install, Configure, Manage
Description:	VMware vSphere: Install, Configure, Manage is our best-selling course. It features intensive hands-on training that focuses on installing, configuring, and managing VMware vSphere 6, which includes VMware ESXi 6 and VMware vCenter Server 6. This course will give you a solid understanding of how to administer a vSphere infrastructure for an organization of any size.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vCloud Networking and Security for vSphere Professionals
Description:	This intensive training course focuses on installing, configuring, and managing VMware

	vCloud® Networking and Security™ for VMware® vSphere® professional use. vCloud Networking and Security is a suite of security virtual appliances built for VMware® vCenter Server™ and VMware ESXi™ integration. vCloud Networking and Security is a critical security component for protecting virtualized data centers from attacks and helping you to achieve your compliance-mandated goals. The course is based on VMware® vShield™ 5.5, ESXi 5.5, and vCenter Server 5.5.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware NSX: Design and Deploy v6.1
Description:	This course prepares students to lead VMware NSX design and deployment projects by giving them an understanding of general design processes and frameworks. Students look at the design and deployment considerations for network virtualization as part of an overall software-defined data center design.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware NSX: Install, Configure, Manage V6.1
Description:	This comprehensive, fast-paced training course focuses on installing, configuring, and managing VMware NSX. This course covers NSX as a part of the software-defined data center platform, implementation use cases along with features of NSX, and functionality operating at Layer 2 through Layer 7 of the OSI model. Lecture and hands-on lab activities support the student's understanding of NSX features, functionality, and on-going management and control.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware NSX for Internetworking Experts Fast Track V6.1
Description:	Overview: comprehensive, fast-paced training course focuses on installing, configuring, and managing VMware NSX™. This course covers

	NSX as a part of the software-defined data center platform, implementation use cases along with features of NSX, and functionality operating at Layer 2 through Layer 7 of the OSI model. Data center network architectures are examined to demonstrate how NSX intersects with and virtualizes functions of a Cisco-based infrastructure in spine-leaf and traditional core-aggregate-access architectures. Lecture and hands-on lab activities support the student's understanding of NSX features, functionality, and on-going management and control.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware NSX: Troubleshooting and Operations v6.1
Description:	This course prepares attendees to troubleshoot and operate a VMware NSX deployment. Students learn how to isolate problems and identify resolutions through a systematic process. In addition, students gain an understanding of how VMware NSX integrates with VMware vRealize Operations, VMware vRealize Log Insight, and other management tools.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vRealize Business: Costing and Implementation V8.0
Description:	VMware vRealize Business (formerly VMware IT Business Management Suite) provides transparency and control over the costs and quality of IT services, enabling the CIO to align IT with the business and accelerate IT transformation. This four-day training course discusses IT costing as well as configuring and managing vRealize Business. This course will give you an understanding of the concepts and functionality of IT finance management with vRealize Business.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vRealize Automation: Install, Configure, Manage V6.2
Description:	This training course focuses on installing, configuring, and managing VMware vRealize Automation. This course covers the configuration and use of the vRealize Automation platform, including self-service provisioning and the creation of multivendor cloud services. This class also helps students understand and achieve the benefits of automation as a component of the software-defined data center.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vRealize Operations Manager: Install, Configure, Manage V6.0
Description:	This training course focuses on installing, configuring, and managing VMware vRealize Automation. This course covers the configuration and use of the vRealize Automation platform, including self-service provisioning and the creation of multivendor cloud services. This class also helps students understand and achieve the benefits of automation as a component of the software-defined data center.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware Mirage: Install, Configure, Manage [V5.0]
Description:	This hands-on training course provides students with skills that they need to deploy a unified image management system using VMware Mirage™. After installing Mirage 5.0, students learn how to configure security, manage images, perform a Windows migration, set up endpoint protection, and perform various management functions.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere Design and Deploy Fast Track 6.0
Description:	This extended-hours training course equips you

	with the knowledge, skills, and abilities to design and deploy a VMware vSphere® 6.0 virtual infrastructure. You follow a proven approach to design and deploy a virtualization solution that is available, scalable, manageable, and secure. This course discusses the benefits and risks of available design alternatives and provides information to support making sound design decisions. In this course, you practice your design skills by working with peers on a design project. You also deploy components of a completed vSphere design. This course is based on VMware ESXi™ 6.0 and VMware vCenter Server™ 6.0.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere: Design Workshop [V5.5]
Description:	The goal of this course is to equip you with the knowledge, skills, and abilities to design a VMware vSphere 5.5 virtual infrastructure that is available, scalable, manageable, and secure. You will design such an infrastructure while meeting your organization's business objectives and working within its constraints and requirements. This course discusses the benefits and risks of available design alternatives and provides information to support making sound design decisions. This course also gives you an opportunity to practice your design skills by working with peers on a design project. The course is based on VMware ESXi and VMware vCenter Server 5.5.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere: Fast Track 5Day
Description:	This intensive, extended-hours and hands-on lab training course focuses on installing, configuring, managing and troubleshooting VMware vSphere® 6, including VMware ESXi™ 6 and VMware vCenter Server™ 6. This course combines the content of our best-selling VMware vSphere: Install, Configure, Manage course with troubleshooting skills needed for maintaining highly available and scalable vSphere environments. Students will gain practical

	experience with these concepts through the completion of hands-on labs
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere: Fast Track 5.5
Description:	his accelerated, extended-hours course packages the complete content of two Authorized VMware courses, VMware vSphere: Install, Configure, Manage [V5.1] and VMware vSphere: Automation with vSphere PowerCLI, with a voucher for the VMware Certified Professional on vSphere 5 (VCP5) exam for five intensive days of VMware vSphere™ skills building and certification preparation. You will gain hands-on experience installing, configuring, and managing VMware vSphere, which consists of VMware ESXi™ 5.1 and VMware vCenter™ Server 5.1. You will also learn to improve efficiency, availability, flexibility, and manageability by automating tasks using VMware vSphere PowerCLI. You will spend nearly half of your time in class completing more than 30 hands-on labs.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Vmware vSphere Install Configure Manage v6.5
Description:	This hands-on training course provides students with skills that they need to deploy a unified image management system using VMware Mirage™. After installing Mirage 5.0, students learn how to configure security, manage images, perform a Windows migration, set up endpoint protection, and perform various management functions.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere: Optimize and Scale
Description:	VMware vSphere: Optimize and Scale is designed for experienced VMware vSphere users. It teaches advanced skills for configuring and maintaining a highly available and scalable virtual

	infrastructure. Through a mix of lecture and hands-on labs, you will configure and optimize the vSphere features that build a foundation for a truly scalable infrastructure and discuss when and where these features have the greatest effect. Anyone who is ready to take their understanding of vSphere to a deeper level and learn how to use advanced features and controls will greatly benefit from this course.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere:Skills for Operators [V6]
Description:	VMware vSphere: Skills for Operators is a two-day technical classroom training course designed to help operators and administrators create and manage virtual machines. This two-day lecture and lab course will help students gain the skills required to work effectively with VMware® virtual machines. This course is based on VMware® ESXi™ 5.5 and VMware® vCenter Server™ 5.5.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere: Troubleshooting Workshop [V5.5]
Description:	This lab-intensive course focuses on providing system administrators with the advanced knowledge, skills, and abilities to achieve competence in troubleshooting the VMware vSphere™ virtual infrastructure. In this course, you will spend most of the time diagnosing and rectifying configuration problems created on VMware® ESX™/ESXi hosts and VMware vCenter™ Server systems.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	VMware vSphere: What\'s New V5.5 to V6
Description:	VMware vSphere: What's New is a hands-on training course that explores the newest features and enhancements in VMware vCenter Server 6 and VMware ESXi 6. Real-world use case

	deployment scenarios, hands-on lab exercises, and lecture material teach the skills you need to effectively implement and configure VMware vSphere 6. This class is recommended for customers who want to deploy vSphere 6 into their existing vSphere environment.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Cloudera Data Analyst Training: Using Pig, Hive, and Impala with Hadoop
Description:	Unitek Education's four-day data analyst training course focusing on Apache Pig and Hive and Cloudera Impala will teach you to apply traditional data analytics and business intelligence skills to big data. Cloudera presents the tools data professionals need to access, manipulate, transform, and analyze complex data sets using SQL and familiar scripting languages.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Cloudera Developer Training for Apache Spark
Description:	Cloudera University's three-day training course for Apache Spark enables participants to build complete, unified Big Data applications combining batch, streaming, and interactive analytics on all their data. With Spark, developers can write sophisticated parallel applications to execute faster decisions, better decisions, and real-time actions, applied to a wide variety of use cases, architectures, and industries.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Introduction to Data Science: Building Recommender Systems
Description:	Data scientists build information platforms to ask and answer previously unimaginable questions. Learn how data science helps companies reduce costs, increase profits, improve products, retain customers, and identify new opportunities. Unitek Education's three-day course helps participants understand what data scientists do and the

	problems they solve. Through in-class simulations, participants apply data science methods to real-world challenges in different industries and, ultimately, prepare for data scientist roles in the field.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Cloudera Administrator Training for Apache Hadoop
Description:	Unitek Education's four-day administrator training course for Apache Hadoop provides participants with a comprehensive understanding of all the steps necessary to operate and maintain a Hadoop cluster. From installation and configuration through load balancing and tuning, Unitek Education's training course is the best preparation for the real-world challenges faced by Hadoop administrators.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Cloudera Developer Training for Apache Hadoop
Description:	Unitek Education's four-day developer training course delivers the key concepts and expertise participants need to create robust data processing applications using Apache Hadoop. From workflow implementation and working with APIs through writing MapReduce code and executing joins, Unitek Education's training course is the best preparation for the real-world challenges faced by Hadoop developers.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Cloudera Training for Apache HBase
Description:	Unitek Education's four-day training course for Apache HBase enables participants to store and access massive quantities of multi-structured data and perform hundreds of thousands of operations per second.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide	Yes

training courses if required:	

Course Name:	Citrix XenApp and XenDesktop Advanced Concepts - Optimizing the End User Experience
Description:	In this course students will learn how to optimize an environment to deliver a great user experience. Starting with the user device and Citrix Receiver, the course covers advanced deployment and configuration options to optimize the delivery of their apps and desktops. Students continue with enhancing the StoreFront experience through custom branding and advanced customization options. Finally, course attendees will learn how to optimize the VDA for a better experience including faster logons, HDX graphics tuning, multimedia, and additional configurations for double hop HDX connections.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Citrix XenApp and XenDesktop Advanced Concepts - Troubleshooting
Description:	In this course students learn how to troubleshoot complex end user and infrastructure issues through the use of support tools, Insight Services, and the PowerShell SDK. The course follows a troubleshooting methodology using real world support issues as example scenarios to demonstrate how to identify and remediate issues with the proper tools. At the end of the course students will have the skills they need to diagnose and remediate failures with a faster time to resolution and to identify the root cause to prevent future occurrences.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	OnCommand Insight: Advanced Report Creation with Report Studio
Description:	This course provides a technical deep dive on how to create highly customized reports from OnCommand Insight data warehouse using Report Studio. This course is 80% hands-on creating and customizing complex reports using Report Studio. It's designed to give the learner a solid, and deep

	technical hands-on experience with Report Studio that will enable them to start generating custom reports.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	NetApp OnCommand Unified Manager Administration
Description:	Learn how to use NetApp® OnCommand® Unified Manager to centralize the deployment, automation, protection, and monitoring of your storage. Unified Manager can effectively and cost-efficiently monitor and manage physical, virtual, and shared storage infrastructures. Unified Manager enables you to optimize utilization, satisfy service-level agreements (SLAs), minimize risk, and increase performance.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Cisco Certified Network Associate (CCNA) Routing and Switching Training Boot Camp v3.0
Description:	Unitek Education's CCNA Routing and Switching Boot Camp is one of the most in-demand and popular CCNA certification training in the nation. It is our guarantee that you will get certified in less time, for less money and gain hands-on experience which you will take back to your job. Our certified and experienced Cisco instructors work with you to train you in ICND1 and ICND2 skills to get you certified as a Cisco Certified Network Associate (CCNA).
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	CCNA Security Boot Camp: Implementing Cisco IOS Network Security (IINS)
Description:	Implementing Cisco IOS Network Security (IINS) v2.0 is a 5-day instructor-led course that is presented by Cisco Training Partners to end users and channel partner customers. The content focuses on the design, implementation, and monitoring of a comprehensive security policy, using Cisco IOS security features and

	technologies as examples. The course covers security controls of Cisco IOS devices as well as a functional introduction to the Cisco Adaptive Security Appliance (ASA). Using instructor-led discussion, lecture, and hands-on lab exercises, this course allows learners to perform basic tasks to secure a small branch office network using Cisco IOS security features available through web-based GUIs (Cisco Configuration Professional) and the CLI on Cisco routers, switches, and ASAs.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Introducing Cisco Data Center Networking (DCICN)
Description:	DCICN will introduce the students to the three primary technologies that are used in the Cisco Data Center. The introductory level of knowledge that is taught in the course is targeted for individuals that will perform only the more basic configuration tasks. The course labs will focus on viewing configurations, but not on making configuration changes or creating new topologies.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Introducing Cisco Data Center Technologies (DCICT)
Description:	DCICN and DCICT will introduce the students to the Cisco technologies that are deployed in the Data Center: unified computing, unified fabric, and network services. The introductory level of knowledge that is taught in these courses is targeted for individuals who can perform only the more basic configuration tasks. The course labs will focus on verifying configurations, with selected exercises involving making configuration changes or designing new topologies.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Introducing Cisco Nexus 9000 Switches in NX-OS Mode (DCINX9K) 1.0

Description:	DCINX9K is a 2-day ILT training program that is designed for systems and field engineers who install and implement the Cisco Nexus 9000 Switches in NX-OS mode. This course covers the key components and procedures you need to know to install, configure, manage, and troubleshoot the Cisco Nexus 9000 Switch platform.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Implementing Microsoft Azure Infrastructure Solutions
Description:	This course is aimed at experienced IT Professionals who currently administer their on-premises infrastructure. The course introduces the students to Microsoft Azure and then teaches them how to manage their infrastructure in Azure rather than on-premises.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Administering a SQL 2016 Database Infrastructure
Description:	The MCSA: SQL 2016 Business Intelligence Development Certification validates your extract, transform, and load (ETL) and data warehouse skills, along with those for implementing BI solutions using multidimensional and tabular data models and online analytical processing (OLAP) cubes. This certification will qualify you for a position as a BI developer. This Unitek Education Boot Camp provides students hands-on experience with SQL Server 2016. The boot camp will highlight what is new in SQL Server 2016 in comparison to SQL Server 2012/2014. It provides guidance on designing, implementing and populating Data Warehouses in SQL 2016. As well as working with cubes and other data models in SQL Server Analysis Services 2016.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Implementing a SQL 2016 Data Warehouse

Description:	This 4-day instructor led course describes how to implement a data warehouse platform to support a BI solution. Students will learn how to create a data warehouse with Microsoft® SQL Server® 2016 and with Azure SQL Data Warehouse, to implement ETL with SQL Server Integration Services, and to validate and cleanse data with SQL Server Data Quality Services and SQL Server Master Data Services.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Developing SQL 2016 Data Models
Description:	This three-day instructor-led course is aimed at database professionals who fulfil a Business Intelligence (BI) developer role. This course looks at implementing multidimensional databases by using SQL Server Analysis Services (SSAS), and at creating tabular semantic data models for analysis with SSAS.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSA: SQL 2016 Database Development
Description:	The MCSA: SQL 2016 Database Administration Certification validates your skills with database installation, maintenance, configuration, and provisioning tasks, and will qualify you for a position as a database administrator or infrastructure specialist. This Unitek Education Boot Camp provides students hands-on experience with SQL Server 2016. The boot camp will highlight what is new in SQL Server 2016 in comparison to SQL Server 2012/2014 . It provides guidance on installing, configuring, and maintaining SQL Server 2016
Location (On or Off-site):	Both
Length of Course:	6 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSE: Private Cloud Boot Camp
Description:	Unitek Education's FastTrack to MCSE Cloud Platform and Infrastructure through Private Cloud prepares students for planning, configuring, optimizing, and deploying cloud solutions

	designed to meet specific organizational needs. Our FastTrack to MCSE Cloud Platform and Infrastructure through Private Cloud helps students demonstrate their expertise with Windows Server and System Center. Gain the skills to build your Microsoft private cloud solution to optimize IT service delivery and gain the automation and flexibility you need for your IT infrastructure, now and in the future.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSE: SharePoint 2013 Boot Camp
Description:	Unitek Education's FastTrack to MCSE Productivity through SharePoint 2013 teaches students how to plan and implement a 2013 SharePoint topology. After our boot camp, earning the MCSE Productivity will earn you recognition and display your expertise in helping organize, collaborate, and share information across organizations.
Location (On or Off-site):	Both
Length of Course:	6 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MS: Dynamics CRM 2013 Boot Camp
Description:	Unitek Education's Microsoft Dynamics 2013 Boot Camp provides professionals from IT to management hands-on experience to develop their skills in installing, deploying, configuring Microsoft Dynamics CRM, as well as exploring the different capabilities available for Sales Management and Customer Service. The different Microsoft Dynamics certifications validate the knowledge and skills associated with implementing and managing CRM software for a wide range of organizations and departments, as well as specific skills required for sales and customer service environments. Microsoft Exchange 2013 powers the new version of Office, making it easy for people to stay connected, access files any time, and maintain messaging security.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Installation and Deployment in Microsoft Dynamics CRM 2013
Description:	Unitek Education's two-day training course provides individuals with the skills to install and deploy Microsoft Dynamics CRM 2013. The training material focuses on the components used within a Microsoft Dynamics CRM deployment, the hardware and software requirements needed to successfully deploy Microsoft Dynamics CRM, and the installation instructions for the primary Microsoft Dynamics CRM components: the Microsoft Dynamics CRM Server, the E-Mail Router, and Microsoft Dynamics CRM for Office Outlook. The course also covers upgrading from earlier versions, configuring an Internet-facing Deployment and administration tasks.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Customization and Configuration in Microsoft Dynamics CRM 2013
Description:	Unitek Education's three day course provides he techniques required to customize Microsoft Dynamics CRM to meet the specialized needs of businesses. The topics covered include security; creation and configuration of entities; design of forms views and charts; auditing and solutions. The course describes each topic and how each topic relates to the other topics to produce a full configured, effective solution.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Monitoring and Operating a Private Cloud
Description:	This course describes how to monitor and operate a cloud with Microsoft® System Center 2012 R2. This course focuses on how to manage and administer a cloud environment, and it describes how you can monitor key infrastructure elements and applications that run within a cloud. It does not discuss planning and implementation, which is covered in 20247: Configuring and Deploying a Cloud with System Center 2012 R2.
Location (On or Off-site):	Both
Length of Course:	5 days

Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Configuring and Deploying a Private Cloud
Description:	This course equips students with the skills they require to configure and deploy a cloud using Microsoft System Center 2012 R2. This course is often taught as part of the FastTrack to MCSE Cloud Platform and Infrastructure through Private Cloud Boot Camp.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSA: Office 365 Boot Camp
Description:	Unitek Education's 5 day MCSA Office 365 Boot Camp prepares you for the next-generation of collaboration and productivity. Learn the essentials of new Office 365 technologies, potential opportunities, usability improvements, deployment, configuration, and management of Office 365. From initial setup this course takes you through all the features from administration and deployment to integration, co-existence, migration and troubleshooting with specific emphasis on individual products: SharePoint, Exchange, and Lync.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Enabling and Managing Office 365
Description:	This is a 5-day instructor-led training (ILT) course that targets the needs of IT professionals who take part in evaluating, planning, deploying, and operating Office 365 services, including its identities, dependencies, requirements, and supporting technologies. This course focuses on skills required to set up an Office 365 tenant, including federation with existing user identities, and skills required to sustain an Office 365 tenant and its users.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Provisioning SQL 2016 Databases

Description:	This three-day instructor-led course provides students with the knowledge and skills to provision a Microsoft SQL Server 2016 database. The course covers SQL Server 2016 provision both on-premise and in Azure, and covers installing from new and migrating from an existing install.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSA: SQL 2016 Business Intelligence Development
Description:	The MCSA: SQL 2016 Business Intelligence Development Certification validates your extract, transform, and load (ETL) and data warehouse skills, along with those for implementing BI solutions using multidimensional and tabular data models and online analytical processing (OLAP) cubes. This certification will qualify you for a position as a BI developer. This Unitek Education Boot Camp provides students hands-on experience with SQL Server 2016. The boot camp will highlight what is new in SQL Server 2016 in comparison to SQL Server 2012/2014. It provides guidance on designing, implementing and populating Data Warehouses in SQL 2016. As well as working with cubes and other data models in SQL Server Analysis Services 2016.
Location (On or Off-site):	Both
Length of Course:	6 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Implementing a SQL 2016 Data Warehouse
Description:	This 4-day instructor led course describes how to implement a data warehouse platform to support a BI solution. Students will learn how to create a data warehouse with Microsoft® SQL Server® 2016 and with Azure SQL Data Warehouse, to implement ETL with SQL Server Integration Services, and to validate and cleanse data with SQL Server Data Quality Services and SQL Server Master Data Services.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Developing SQL 2016 Data Models
Description:	This three-day instructor-led course is aimed at database professionals who fulfil a Business Intelligence (BI) developer role. This course looks at implementing multidimensional databases by using SQL Server Analysis Services (SSAS), and at creating tabular semantic data models for analysis with SSAS.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Querying Data with Transact-SQL SQL Server 2016
Description:	The main purpose of this 3 day instructor led course is to give students a good understanding of the Transact-SQL language which is used by all SQL Server-related disciplines; namely, Database Administration, Database Development and Business Intelligence. As such, the primary target audience for this course is: Database Administrators, Database Developers and BI professionals. The course will very likely be well attended by SQL power users who aren't necessarily database-focused; namely, report writers, business analysts and client application developers.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Developing SQL 2016 Databases
Description:	This four-day instructor-led course provides students with the knowledge and skills to develop a Microsoft SQL Server 2016 database. The course focuses on teaching individuals how to use SQL Server 2016 product features and tools related to developing a database.
Location (On or Off-site):	Both
Length of Course:	4 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Querying Microsoft SQL Server
Description:	Unitek Education's Querying Microsoft SQL Server 5-day instructor led course provides students with the technical skills required to write

	basic Transact-SQL queries for Microsoft SQL Server 2014. This course is the foundation for all SQL Server-related disciplines; namely, Database Administration, Database Development and Business Intelligence. This course helps people prepare for exam 70-461.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Administering Microsoft SQL Server Databases
Description:	Unitek Education's Administering Microsoft SQL Server Databases 5day instructor-led course provides students with the knowledge and skills to maintain a Microsoft SQL Server 2014 database. The course focuses on teaching individuals how to use SQL Server 2014 product features and tools related to maintaining a database.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Implementing a Data Warehouse with Microsoft SQL Server
Description:	Unitek Education's Implementing a Data Warehouse with Microsoft SQL Server course describes how to implement a data warehouse platform to support a BI solution. Students will learn how to create a data warehouse with Microsoft SQL Server 2014, implement ETL with SQL Server Integration Services, and validate and cleanse data with SQL Server Data Quality Services and SQL Server Master Data Services
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSE: SQL Business Intelligence Boot Camp
Description:	This six-day instructor-led course teaches students how to design and implement a BI infrastructure for enterprise data models and reports. The course discusses design, installation, and operations of a BI platform, including Microsoft SQL Server Analysis Services, SQL Server Reporting Services, and Microsoft SharePoint Server. This course will also cover how to empower information workers through self-service analytics

	and reporting. Students will learn how to use Microsoft SQL Server Reporting Services, and Microsoft Excel to deliver a self-service BI solution, and how to use Microsoft Windows Azure HDInsight to incorporate Big Data analysis into a BI scenario.
Location (On or Off-site):	Both
Length of Course:	6 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Implementing Data Modules and Reports with Microsoft SQL Server
Description:	Unitek Education's Implementing Data Modules and Reports with Microsoft SQL Server five-day instructor-led course is on creating managed enterprise BI solutions. It describes how to implement multidimensional and tabular data models, deliver reports with Microsoft SQL Server Reporting Services, create dashboards with Microsoft SharePoint Server PerformancePoint Services, and discover business insights by using data mining.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Designing Self-Service Business Intelligence and Big Data Solutions
Description:	Unitek Education's Designing Self-Service Business Intelligence and Big Data Solutions five-day instructor-led course teaches students how to implement self-service Business Intelligence (BI) and Big Data analysis solutions using the Microsoft data platform. The course discusses the rationale for self-service BI, and describes how to use Microsoft SQL Server Reporting Services, Microsoft Excel, Microsoft SharePoint Server, and Microsoft Office 365 Power BI to create self-service data models and reports. The course then goes on to describe how to use Windows Azure HDInsight to perform Big Data analysis.
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	MCSE: SQL Data Platform Boot Camp
Description:	Unitek Education's FastTrack to MCSE Data

	Management and Analytics through SQL Development (SQL Server 2014) Boot Camp teaches students how to design and implement SQL Server 2014. After the boot camp, Earning the FastTrack to MCSE Data Management and Analytics through SQL Development will demonstrate your broad skill sets in building and administrating enterprise-scale data solutions both on-premises and in cloud environments. An MCSE Data Platform certification will display your expertise to implement database objects and programming objects, optimize and troubleshoot queries, design a troubleshooting and optimization solution
Location (On or Off-site):	Both
Length of Course:	6 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Developing Microsoft SQL Server Databases
Description:	Unitek Education's Developing Microsoft SQL Server Databases 5-day instructor-led course introduces SQL Server 2014 and describes logical table design, indexing and query plans. It also focusses on the creation of database objects including views, stored procedures, along with parameters, and functions. Other common aspects of procedure coding, such as indexes, concurrency, error handling, and triggers are also covered in this course. Also this course helps you prepare for the Exam 70-464
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Designing a Data Solution with Microsoft SQL Server
Description:	The focus of this three-day instructor-led course is on planning and implementing enterprise database infrastructure solutions by using SQL Server 2014 and other Microsoft technologies. It describes how to consolidate SQL Server workloads and how to plan and implement high availability and disaster recovery solutions. Note: This course is designed for customers who are interested in learning SQL Server 2012 or SQL Server 2014. It covers the new features in SQL Server 2014, but also the important capabilities across the SQL Server data platform.

Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Managing SQL Business Intelligence Operations
Description:	This three-day instructor-led course is aimed at database professionals who manage Business Intelligence (BI) operations. This course looks at various options that provide the ability of business users to analyze data and share their findings, starting with managed BI data sources and expanding to personal and external/public data sources.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Analyzing Data with Power BI
Description:	his two-day instructor-led course provides students with the knowledge and skills analyze data with Power BI.
Location (On or Off-site):	Both
Length of Course:	2 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	Analyzing Data with SQL Server Reporting Services 2016
Description:	This two-day instructor-led course provides students with the knowledge and skills analyze data with Power BI.
Location (On or Off-site):	Both
Length of Course:	3 days
Submit Proof of Authorization to provide training courses if required:	Yes

Course Name:	SEC-CAP - Certified Authorization Professional (CAPS) Boot Camp
Description:	This course, offered by Unitek Education, is designed for the information security practitioner who champions system security commensurate with an organization's mission and risk tolerance, while meeting legal and regulatory requirements. It conceptually mirrors the NIST system authorization process in compliance with the Office of Management and Budget (OMB) Circular A-130, Appendix III. Led by an (ISC)2 authorized instructor, the CAP training seminar

	provides a comprehensive review of information systems security concepts and industry best practices, covering the 7 domains of the CAP CBK: Risk Management Framework (RMF) Categorization of Information Systems Selection of Security Controls Security Control Implementation Security Control Assessment Information System Authorization Monitoring of Security Controls
Location (On or Off-site):	Both
Length of Course:	5 days
Submit Proof of Authorization to provide training courses if required:	Yes

29. **Training Prices:**

Price per Student per Day (based on Max attendance)

The rates shown below include the Industrial Funding Fee (IFF) of 0.75%.

SIN	Course Title	Course Length	Minimum Participants	Maximum Participants	GSA Price
132-50	Citrix XenApp 6.5 Administration	40 hrs	1	1	$ 2,518.89
132-50	Citrix XenApp and XenDesktop Help Desk Support	16 hrs	1	1	$ 1,511.34
